

Practical 2 Write a program to find length of string and print second half of the string.

```
import java.util.Scanner;

class prac2_2
{
    public static void main(String args[])
    {
        Scanner scan = new Scanner(System.in);

        int len;

        String s1;

        System.out.println(" Enter String: ");

        s1 = scan.nextLine();

        len=s1.length();

        System.out.println(" String Length : "+len);

        len=len/2;

        System.out.println(" Second Half of Entered String: ")      ;

        System.out.println(s1.substring(len));

    }
}
```

```
C:\Windows\System32\cmd.exe
C:\Java>javac prac2_2.java
C:\Java>java prac2_2
Enter String:
Shape of You
String Length : 12
Second Half of Entered String:
of You
C:\Java>
```
