

Practical 3 Write a program to count the number of words that start with capital letters

```
import java.util.Scanner;

class prac3_2
{
    public static void main(String args[])
    {
        Scanner scan = new Scanner(System.in);

        int count = 0, len, j;
        char ch;
        String s1;
        System.out.println(" Enter String: ");
        s1 = scan.nextLine();
        len = s1.length();
        for(int i = 0 ; i < len; i++)
        {
            j = 0;
            ch = s1.charAt(i);
            if(ch >= 65 && ch <= 90)
            {
                if(ch == ' ' || ch == '\0')
                {
                    count++;
                }
                count++;
            }
        }
        System.out.println(" No. of Words: " + count);
    }
}
```

```
C:\Windows\System32\cmd.exe

C:\Java>javac prac3_2.java

C:\Java>java prac3_2
Enter String:
Hello World! How are you?
No. of Words: 3

C:\Java>
```
