

Practical-2

Implement File handling Program.

```
#include <stdio.h>
#include <conio.h>
void main()
{
    FILE *f;
    char c;
    clrscr();
    f = fopen("harsh.txt", "w");
    printf("Enter Line:\n");
    while((c=getchar()) != EOF)
        putc(c,f1);
    fclose(f1);
    printf("\nThe File contains :\n\n");
    f = fopen("hiren.txt","r");
    while((c=getc(f)) != EOF)
        printf("%c",c);
    fclose(f);
    getch();
}
```

OUTPUT:

Enter Line:

My Name is Kaustubh Wade.

The File contains:

My Name is Kaustubh Wade.
