

Practical 2 Design an HTML page with ordered list, unordered list, definition list and nested lists.

Ordered List

```
<html>

<head> <title></title>  </head>

<body>

<h3>Kaustubh Wade(160410116050)</h3>

<p align="center">Ordered List</p>

<ol>    List of Countries

        <li>        India

        <li>        USA

        <li>        UK

</ol>

</body>

</html>
```

Unordered List

```
<html>

<head> <title></title>  </head>

<body>

<h3>Kaustubh Wade(160410116050)</h3>

<p align="center">Unordered List</p>

<ul>   List of Countries

        <li>   India

        <li>   USA

        <li>   UK

</ul>

</body>

</html>
```

Definition List

```
<html>

<head> <title> </title> </head>

<body>

<h3>Kaustubh Wade(160410116050)</h3>

<p align="center">Definition List</p>

<dl> Contents

    <dt> Chapter 1

        <dd> Topic 1

        <dd> Topic 2

        <dd> Topic 3

    <dt> Chapter 2

        <dd> Topic 1

        <dd> Topic 2

    <dt> Chapter 3

        <dd> Topic 1

        <dd> Topic 2

</ul>

</body>

</html>
```

Unordered List inside Ordered List

```
<html>

<head> <title> </title> </head>

<body>

<h3>Kaustubh Wade(160410116050)</h3>

<p align="center">Unordered List inside Ordered List</p>

<ol> Contents

    <li> Topic 1

    <li> Topic 2

    <li> Topic 3

    <ul> Topic 4

        <li> SubTopic 1

        <li> SubTopic 2

    </ul>

    <li> Topic 5

</ol>

</body>

</html>
```

Ordered List inside Unordered List

```
<html>

<head> <title> </title> </head>

<body>

<h3>Kaustubh Wade(160410116050)</h3>

<p align="center">Unordered List inside Ordered List</p>

<ol> Contents

    <li> Topic 1

    <li> Topic 2

    <li> Topic 3

    <ul> Topic 4

        <li> SubTopic 1

        <li> SubTopic 2

    </ul>

    <li> Topic 5

</ol>

</body>

</html>
```
