

Practical 1 Write a program to convert rupees to dollar. 60 rupees=1 dollars.

```
class money
```

```
{    int dollar;

    void getdollar(int a)

    {    dollar = a;    }

    int putdollar()

    {    return dollar;  }

}
```

```
class prac1_1
```

```
{    public static void main(String args[])

    {    money m = new money();

        int a = Integer.parseInt(args[0]);

        m.getdollar(a);

        System.out.println(" Converted Dollars : "+ (m.putdollar()/60));

    }

}
```

```
C:\Windows\System32\cmd.exe
