\* Project Abstract: for two weeks. The amount of rust was recorded on both types of nails. I repeated these steps for two types of nails in freshwater. My results of my data resolves that galvanized and common nails in freshwater had a higher average or rust than the other nails in salt water. My data also concludes that the rusting color was black. In conclusion the nails in freshwater rusted more than the nails in saltwater. Saltwater may rust something faster than freshwater, but salt contains sodium chloride in which it causes the nails in saltwater to rust at a slower rate.

Periodic Progress Report (PPR) Submission

**Periodic Progress Report : PPR**

**1. What Progress you have made in the Project ?**

Continuous reporting functionality in the participant portal is activated at the time the project starts and it is continuously open for the beneficiaries to submit deliverables, to report on progress in achieving milestones, to follow up of critical risks, ethics issues, publications, communications activities, and the answers to the questionnaire on horizontal issues.

**2. What challenge you have faced ?**

When the coordinator submits the periodic report, the IT tool will capture the information from the continuous reporting module in order to generate the Part A of the periodic technical report. The IT tool will consolidate the individual financial statements and it will generate automatically the report with explanations of the use of resources and the periodic summary financial statements, which corresponds to the request for payment.

**3. What support you need ?**

This section must be completed on-line with suitable quality to enable direct publication by the Commission/Agency. It should be easy to read, i.e. written in a language easily understandable by a broader public, thereby promoting the dissemination and supporting the exploitation of EU funded results. It should preferably not exceed

**4. Which literature you have referred ?**

The differences in communication styles between men and women has been a topic of interest in the research world for many years. These differences may lead to miscommunication, conflict, and even dissatisfaction between couples. This study analyzes the communication styles among genders, more specifically among married couples. It questions how differences in communication styles between married couples married five years or less affect marital satisfaction. The study will be conducted through an online interview and will analyze the relationship of communication and how it relates to marital satisfaction in order to ultimately aid in the rise of marital satisfaction and the decrease of the divorce rate in the United States.

**Note :**

- (1) If you want to give any other details as part of your PPR (apart from answering above questions) you can give details via attaching specific file (jpg, png, gif, doc, xls, xlsx, docx, jpeg, pdf, ppt, pptx) and maximum file size 5 MB.
- (2) File name with any special character will not allowed to upload on PMMS system.

**Document :** Choose File PPR\_1.jpg

**Note :**

1. If you click on **Save**, your PPR will be saved and you can edit the same in future.
2. If you click on **Submit**, your PPR will be submitted and you will not be able to edit the same in future.

Design Engineering Canvas

**Objectives of design canvas activities:**

Design Engineering is a subject based on Design Thinking that will change the mind-set of young engineers to create innovation, entrepreneurship, skill development culture in India. Design Thinking is Human Centred process with specific steps like Observation, Empathy, Ideation, Product Development, Prototype and Test with lots of iterations. All Canvases, framework, tools & techniques are useful to enhance creativity and innovation in the projects. Design Engineering must be considered as philosophy rather a subject.

**Task**

During semester 7 the student teams are required to carry out the following design engineering canvas activities related to student's project to identify and filter out good ideas and project definition to work upon:

1. AEIOU Summary
2. Empathy Summary
3. Ideation
4. Product Development

- The Institute/College will arrange workshops for different design canvases like Empathy Summary, Ideation and similar design thinking practices.
- All the student-teams are required to participate in the workshops, involving the whole of the class and prepare the necessary documents. Students' teams need to summarize AEIOU framework activity for observation part in Empathy Summary.
- Then they need to document selected challenges of the Final Year problem that they have selected.
- Out of those challenges the top 5 problems need to be selected on the basis of desirability, feasibility and viability.
- After discussion with Faculty Guide and other groups, the final problem statement may be defined. All teams need to validate their problem statements with the users.

After studying each patent thoroughly and by discussing all the previous questions, each student has to answer this question very carefully and give your valuable ideas in a very precise manner. Here students have to think for any possible modification/improvement in the studied patent. He/she can make so as to maximise its effectiveness/user friendliness.

Note: The data of PSAR reports will be made online for lateral learning by other faculty and students in next semester/year. After review of each innovative idea (answer of PSAR question no. 27), faculty will review it and best ideas will be identified and transformed/taken into really innovative projects to build novel product or processes in next semester or year. This will enhance the level of innovative idea/projects and mitigate the duplication of work.

\* GTU Patent Clinic Program : What is this ?  
It's a unique initiative started by GIC to provide all possible assistance to students and faculty members from any branch of science or technology, to file patent for his/her innovative work or project/GP/UDP. Patent Clinic is a two days workshop in which GTU Innovation Council (GIC) organizes seminars and workshops on basics of IPR(Patents, Patent Prior Art Search (PAS)) Techniques and its importance, Patenting System in India and hands on exercises to draft patents.

The whole value chain of patent search for novelty checking of any project is carried out using open source and paid patent databases. The access to paid databases for students and faculty members is provided through knowledge partner like CII. Patent drafting exercise is covered during a span of two days along with practical sessions. The whole program is delivered absolutely free of costs to students and faculty members of GTU.

Students who are interested will be informed via email.  
 Yes  No

\* Crowdfunding Initiator (CFI) : What is CFI?  
This is a flagship program at GTU to help student innovators raise funds through crowdfunding to develop their prototypes and build better prototype of their innovations once they finish their GP/UDP work. CrowdFunding Initiator is a summer boot camp, being organized to help final year students through a week long boot camp supported by GTU. During this program expert mentors and guides will help best GP/UDP teams who wish to raise fund and train them on how to do this. The entire program is free of cost for all GTU students.

Students who are interested will be informed via email.

### 28. PDE Form 1

1. Go to Upload PDE Form 1 tab from Student menu as shown in below screen.

The screenshot shows the GTU Project Monitoring and Mentoring System (PMMS) interface for students. At the top, there's a header with the GTU logo, the system name 'GTU - Project Monitoring and Mentoring System', and user information ('Welcome Shingala Hirenkumar Vinubhai' and 'Sign Out'). Below the header is a blue navigation bar with 'My Account' and 'Student' tabs. Under 'Actions, Approvals & Manage', there's a 'Check Activity Status' button highlighted with a red box. The main workspace is divided into sections: '(1) Team Formation Status' and '(2) Student Activity Status'. In '(1)', there are fields for 'Is Team registered?' and 'Is Team approved?'. In '(2)', there's a table with columns 'Activity', 'Status', and 'Comments' (with sub-columns 'ed', 'Commented', and 'Reviewed'). The 'PDE Form 1' button is also highlighted with a red box. A large red circle containing the letter 'A' is overlaid on the right side of the workspace area.

**Declaration by the applicant(s):**

I/We, the applicant(s) hereby declare(s) that

The invention is new & has not been disclosed in any manner in any publication or in any other form before the date of this application.

The provisional/complete specification relating to the invention is filed with this application.

The invention as disclosed in the specification uses the biological material from India and the necessary permission from the competent authority shall be submitted by me/us before the grant of patent to me/us.

There is no lawful ground of objection to the grant of the patent to me/us.

I/we are the assignee/s or the legal representative of true & first inventors.

The application or each of the application/particulars of each are given in the para 5 was the first applicant in the convention country/countries in respect of my/our invention.

The application or each of the application/particulars of each are given in the para 5 was the first applicant in the convention country/countries in respect of my/our invention.

I/We claim the priority from the above mentioned application/s filed in the convention country/countries & state that no application for protection in respect of invention had been made in a convention country before that date by me/us or by any person.

My/Our application in India is based on international application under Patent Cooperation Treaty (PCT) as mentioned in para 6

The application is divided out of my/our application/s particulars of which are given in para 7 and pray that this application may be treated as deemed to have been filed on \_\_\_\_\_ under section 16 of the Act.

The said invention is an improvement in or modification of the invention particulars of which are given in para 8.

**10. Following are the attachments with the applications :**

(a) Provisional specification/Complete specification

(b) Complete specification/in confirmation with the international application / as amended before the International Preliminary Examination Authority (IPEA), as applicable(2 copies)/No.of pages... No.of claims....

(c) Drawings (in confirmation with the international application)/as amended before the International Preliminary Examination Authority(IPEA), as applicable(2 copies)/No.of sheets....

Note : \* Indicates mandatory field.

1. Title of the project/invention : Research Agenda In Cloud Technologies

2. Preamble to the description : Provisional

3. Description :

\* a) Field of Project / Invention / Application : security mechanisms offered by the services to be similar, indicating that the cloud industry has established a number of "best-practices", while other security mechanisms vary widely, indicating that there is also still room for innovation and experimentation. This paper investigates these differences and possible underlying reasons for it. It also contrasts the security mechanisms offered by public IaaS cloud offerings with security mechanisms proposed by academia over the same period.

\* b) Prior Art / Background of the Project / Invention : module development interface), and automatically tracks how an instruction accesses the kernel object and assigns a bit-vector for each observed kernel object. This bit-vector encodes which system call accesses the object and how the object is accessed (e.g., read, write, create, destroy), from which we derive the meaning of the kernel object based on a set of rules developed according to the general understanding of OS kernels.

\* c) Summary of the Project / Invention : from related technologies, advances in the introduction of protocols, interfaces, and standards; techniques for modelling and building clouds; and new use-cases arising through cloud computing.

\* d) Objects of Project / Invention : computing, and made a systematic review necessary, which analyses the research done and explains the resulting research agenda. We performed such a systematic review of all peer-reviewed academic research on cloud computing, and explain the technical challenges facing in this paper.

\* 6. Abstract of the project / invention : This paper surveys the emerging paradigm of cloud mobile media. It discusses two alternative perspectives for cloud mobile media networks: an end-to-end view and a layered view. Summaries of existing research in this area are organized according to the layered service framework.
