ONE PAGE INTRODUCTION OF SUBJECT

- **Introduction**

    This subject base on programming language and one trading framework, this subject split in tree part first one is C# language second one is windows and last part is ASP.Net. this subject help to create the Solutions/Applications using C#.NET. C#.NET is Microsoft's entry into the world of managed programming. Using a syntax that is deliberately from Java, C++ and C, C#.NET achieves a natural trade-off of terseness and clarity, enabling programmers to express concepts in a clear and maintainable form. The recent enhancements to the language have made it even more powerful than before, allowing programmers to work with C#.NET in both an Object-Oriented and partially functional style.

- **Pre-requisite to study the subject**
    - Object orientated fundamental concepts
    - Basic HTML knowledge
    - Basic Database knowledge
    - Basic of c and c++.

- **Field of application**
    - Desktop application
    - Web application
    - To create Web Service
    - To create web API

- **Pre-requisite to study the subject of higher semester**
    - Final year project

- **Contributors in the development of the subject**
    - We provide live demonstrate in lecture.
