Practical 12 Refine the student manager program to manipulate the student information from files by using the DataInputStream and DataOutputStream. Assume suitable data

```java
import java.io.*;
class StudentDATA
{
        public static void main(String[] args)
        {
                String name = "Kaustubh Wade";
                try
                {
                        FileOutputStream fo1 = new FileOutputStream("kaus.txt");
                        DataOutputStream do1 = new DataOutputStream(fo1);
                        do1.writeUTF(name);
                        do1.close();
                        FileInputStream fi1 = new FileInputStream("kaus.txt");
                        DataInputStream di1 = new DataInputStream(fi1);
                        String name1 = di1.readUTF();
                        System.out.println("Name: " + name1);
                }
                catch (Exception e)
                {
                        System.out.println(e);
                }
        }
}
```
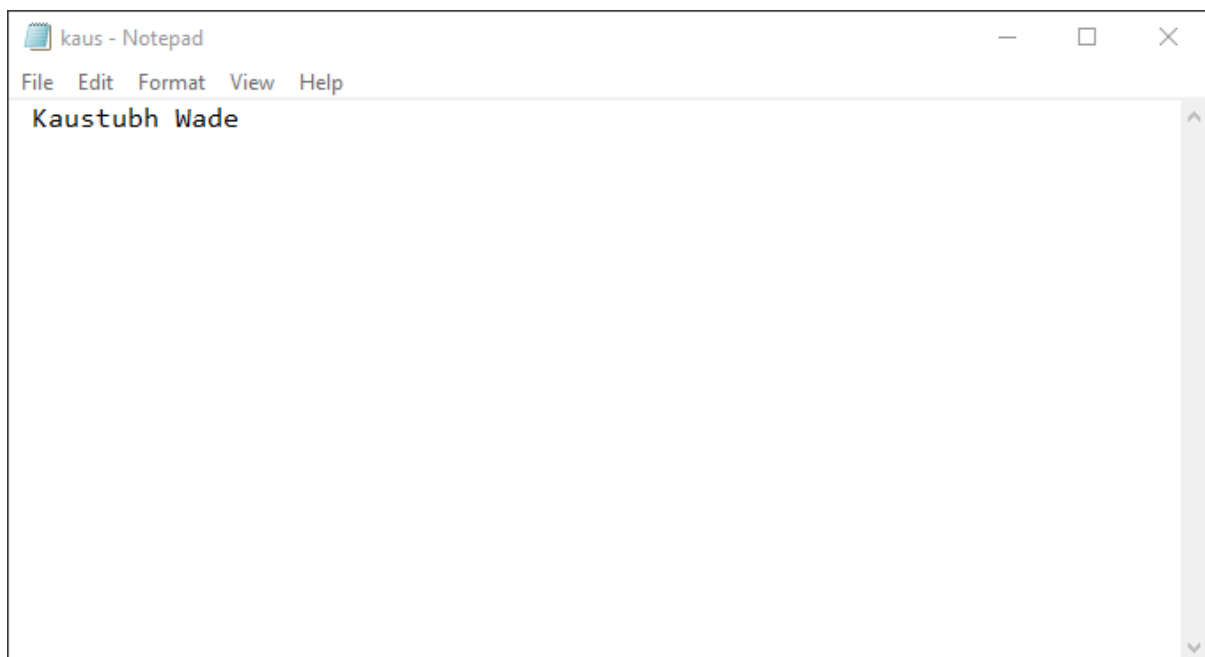

C:\Windows\System32\cmd.exe

```
C:\Users\shail\Desktop\IT Study Material\5S TY 1\OOPJ\Practicals\Prac>javac prac12.java

C:\Users\shail\Desktop\IT Study Material\5S TY 1\OOPJ\Practicals\Prac>java StudentDATA
Name: Kaustubh Wade

C:\Users\shail\Desktop\IT Study Material\5S TY 1\OOPJ\Practicals\Prac>
```

kaus - Notepad
